

TIME NAVIGATOR FOR IBM LOTUS DOMINO

Datasheet

Data Protection Solution

Time Navigation offers a powerful graphical interface

AUTOMATED DATA PROTECTION FOR DOMINO SERVER

Whether IBM Lotus Domino is managing your E-mail, internet/ intranet data, or is providing a complete enterprise information system, the high volumes of data held and shared by your Notes system is of major strategic value to the organization in ensuring business continuity and, ultimately, profitability.

Atempo's Time Navigator is designed to provide the most advanced data protection to large IBM Lotus Domino Server databases.

The **Time Navigator for IBM Lotus Domino** application agent is specifically designed to address collaborative data protection issues in intensive working environments. **Time Navigator for IBM Lotus Domino** offers the best level of scalability in the groupware data protection industry.

Time Navigator for IBM Lotus Domino allows to back up and recover data from IBM Lotus Domino 4.x through IBM Lotus Domino 6.5 platforms including cluster configurations.

FEATURES & BENEFITS

HIGH PERFORMANCE

Time Navigator for IBM Lotus Domino is highly flexible and allows you to choose the fastest backup architecture: either direct-attached or through the network. You can use high-speed disk subsystems or high-speed tape devices as the backup media.

INTUITIVE MANAGEMENT

As Time navigator for IBM Lotus Domino backup application provide an easy to use graphical interface from a centralized management console, Time Navigator offers a powerful and integrated environment of your IBM Lotus Domino backup and recovery solution for a lower administration workload.

SCALABILITY

Time Navigator backup Application for IBM Lotus Domino allows the backup of any IBM Lotus Domino server at either database, block level, notes level or mailboxes level.

FULLY AUTOMATED DATA PROTECTION

Time Navigator allows to centralize IBM Lotus Domino backups on a single device and automates operations like scheduling and monitoring. It enables you to fully automate the data protection of IBM Lotus Domino servers while reducing backup administration management and costs.

FAST RECOVERY

Time Navigation, and synchronizing feature to restore database and logs files, is available on IBM Lotus Domino servers. It enables easy, powerful and consistent restore with no risk of databases corruption due to mismatch between logs files and databases.

COMPLIANT TO YOUR DISASTER RECOVERY PLAN

Time Navigator can easily restore a whole IBM Lotus Domino data set to a recovery server using cross restoration feature.

FEATURES & BENEFITS

Storage Challenges

- Protect large IBM Lotus Domino databases on heavy-duty collaborative and messaging environment .
- Protect large IBM Lotus Domino databases up to Terabytes.
- SLA request no downtime in messaging and collaborative services, even when recovering a databases or note.
- Provide restoration at a specified time.
- Optimize disk space usage

Time Navigator Features

- Time Navigator backup application for IBM Lotus Domino allows 'hot' backup of IBM Lotus Domino databases.
- Parallel backup of databases allows high throughput.
- Backup to Disk allows fast backup and recovery.
- Time navigator for IBM Lotus Domino handles IBM Lotus Domino recovery storage group or cross restoration for IBM Lotus Domino. It is possible to restore a database or a note while the server is running.
- Time Navigator support point in time recovery by restoring databases and recovering logs at a specified time.
- Time Navigator manages efficiently logs file by purging logs after each full backup.

Enterprise Benefits

- No impact on users. E-mail and groupware services are available, even during backup operations.
- Comply with the backup window allowed by the I.T.
- No downtime for data recovery, full availability from Lotus Domino servers at any time for any users.
- In case of corruption, save time by recovering a situation before the corruption.
- Resolve disk space issues by reducing the volume of logs files present on disk.

SUPPORTED CONFIGURATIONS

Module

- Time Navigator for IBM Lotus Domino 4.x
- Time Navigator for IBM Lotus Domino 5.x
- Time Navigator for IBM Lotus Domino 6.x

Platform

- Windows NT, Windows 2000
- Windows NT, Windows 2000
- Windows NT, Windows 2003

Features

- Backup restore Lotus domino database
- Full, incremental
- Granularity: Databases, Block, Notes
- Backup restore Lotus domino database
- Full, incremental
- Granularity: Databases, Block, Notes
- V5 mode Support
- Backup restore Lotus domino database
- Full, incremental
- Granularity: Databases, Block, Notes
- V5 mode Support, Point in time restore, logs files management.

ABOUT ATEMPO

Atempo is a leader in data protection for information lifecycle management (ILM). Atempo's Time Navigator™ data protection suite delivers comprehensive data security and unparalleled recovery performance, allowing users to rapidly and accurately restore data from any given point in time. Time Navigator provides the infrastructure enabling enterprises to achieve their ILM objectives, including compliance with new regulatory requirements. Founded in 1992, Atempo has more than 2000 customers worldwide, with a sales and support network exceeding 100 resellers. The company's dual headquarters are in Palo Alto, Calif., and Paris, France.
